### **DETAILED ACTION**

1. Claims 1-32 are pending in this application.

#### ***Response to Arguments***

2. Applicant's arguments filed 11/13/03 have been fully considered but they are not persuasive.

As to claim 1 and 17, the applicant argues "Cheng neither teaches or suggests "updating the destination table with a row from the results of the outer join operation containing a matching element in the first and second columns."

The examiner respectfully disagrees with the above argument. Cheng states full join query into a union query of left outer join and right outer join, at 501-503. However, in order to ensure that the query returns the correct answer, for the right outer join all the matched rows are filtered out from 504-506. To indicate that the output from the right outer join is a matched row, a non-nullable column of the null-producing operand is added to the output of the right outer join at 504. The non-nullable column includes a primary key (key), and a row identifier (rid) or tuple identifier (tid). The value of this column is set to null at 505 when there is not a match ion the tuple-preserving operand by the definition of the outer join (col. 9, lines 19-21). The matched row is added to the non-nullable, the target column, after the output of the outer join operation. The inserting is the added null value to all the rows from the right outer join operation. Since the claimed limitation of a full outer join differentiate from outer join is the combination of the left outer join and the right outer join. Therefore, the Cheng's teaching is read into the claimed limitation.

As to claims 5 and 21, please see the same argument for claims 1 and 7.

As to claims 9, 13, 25 and 29, the method and computer program product for updating the row in fail comparison, this is the same method with claims 1 and 7, excepting for full outer join operation. Therefore, the claims the same arguments apply for all claim 9, 13, 25 and 29.

3. Please see previous rejection dated on 11/13/03 for all claims.

***Conclusion***

**4. THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
